CAREER OBJECTIVE

Seeking a responsible career position which will utilize my technical skills and knowledge and gives an opportunity to enhance my career prospects which contribute to growth of the company and move towards professional success in life.

EDUCATION

- Master of Computer Applications** – Vijayam Business School in Chittoor 2021-2023
Percentage- 75%
- Bachelor of Computer Science** – Vijayam Science & Arts Degree College in Chittoor 2018-2021
Percentage- 79%
- Board of Intermediate** – Narayana Junior College in Chittoor 2016-2018
Percentage – 71%
- Secondary School of Education** –Little Flower E.M School in Chittoor 2015-2016
Secured an aggregate of 7.5 CGPA

SKILLS SUMMARY

- Technical Skills:** Python, MYSQL, HTML5, CSS3.JavaScript, WordPress,WooCommerce.
- Platforms:** Visual Studio Code, Jupyter Notebook, MYSQL Workbench
- Libraries:**Pandas,Numpy,Bootstrap5..
- Soft Skills:** Ability to learn, Problem solving, Communication, Adaptability, Analytical skills, Collaboration.

INTERNSHIP EXPERIENCE

Visual Analyst Intern | *BLP Pvt Ltd, Bengaluru*
Duration: [10/24 –01/25]

- Worked on an object detection project, utilizing deep learning techniques and Python to improve accuracy.
- Utilized LabelImg for labeling objects and creating training datasets for deep learning models.
- Conducted iterative testing and presented insights through visual reports to aid decision-making.
- Gained hands-on experience in data preprocessing, model training, and object annotation workflows.

CERTIFICATES

- Currently pursuing an internship focused on front-end web Development.
- Certified in (Visual Analyst Role) by BLP Company

PROJECTS

Project Title: **Personal Protective Equipment (PPE) Object Detection Using YOLO Algorithm**

- Tools Used:** Python, YOLO (You Only Look Once) Algorithm, LabelImg, LabelME, Hasty.AI, TensorFlow
- Project Description:** The project focuses on developing an object detection model to identify and classify Personal Protective Equipment (PPE) worn by individuals in real-time environments. The goal was to ensure compliance with workplace safety standards by detecting PPE such as helmets, gloves, safety vests, and masks.

Key Components:

- Data Preparation:** Annotated a custom dataset using LabelImg, including both PPE and non-compliance scenarios to create a comprehensive training dataset.
- Model Training:** Trained the model using the YOLO algorithm on the prepared dataset, employing hyperparameter tuning and data augmentation techniques to enhance detection accuracy.
- Performance Evaluation:** Achieved high mean Average Precision (MAP), demonstrating reliable and consistent detection across all PPE categories.
- Deployment:** Deployed the model using OpenCV to process live video feeds, enabling real-time PPE compliance monitoring.
